ACTIVITY NO. ___ Seatwork 3.1 Singly Linked List

1. PROCEDURE OUTPUT

What procedures did you perform?

Reflection:

- Doing this Singly Linked List activity helped me understand how linked lists work in C++. At first, I found it a little confusing because I had to use pointers and connect each node to the next one. After writing the code and testing it, I started to understand how the nodes are linked together. I also learned how to display the list and perform simple operations like adding and deleting nodes. I realized that even a small mistake, such as forgetting to update a pointer or missing a semicolon, can cause errors in the program. Because of this, I learned to check my code carefully and test it step by step.

2. ANSWERS TO SUPPLEMENTAL ACTIVITY

Copy and paste the questions from the lab and include your answers after.
